INTERPERSONAL SKILLS

- Teamwork
- Time management
- Leadership
- Effective communication
- Critical thinking

TECHNOLOGICAL SKILLS

- Java
- C++/C++
- Data Structures and Algorithms
- SQL, MySQL
- C#
- Web Development (HTML, CSS, and JS)
- Docker
- Networking
- Linux

COURSES

- NDG LINUX ESSENTIALS
- CCNA: Introduction to Networking
- Java (Spring Boot)
- CCNA: Fundamentals of Switching, Routing, and Wireless
- AI
- ALURA FRONT-END (HTML, CSS, JS, and React)

LANGUAGES

- English
- Portuguese

MANUEL MAZUNGA DE ALMEIDA

COMPUTER SCIENCE STUDENT

PROFILE

Software Developer focused on highly complex systems, with an academic background as a finalist in Computer Science from Agostinho Neto University and completion of Common Core at Escola 42. I have strong proficiency in C/C++ and experience in developing robust infrastructures, ranging from customized web servers and multithreading to application containerization. Specialist in self-taught learning, high performance, and solving structural problems in high-pressure environments.

Technical Skills:

Programming: C, C++, Shell Scripting, Rust.

Systems and DevOps: Docker (Containerization), Server Architecture (HTTP/Webserv), Multithreading, Memory Management.

Infrastructure and Networks: IP Protocols, Routing, Network Configuration (NetPractice), and Cybersecurity.

Soft Skills: Quick learner, Peer-to-peer learning, and focus on scalability.

EDUCATION

Bachelor of Science in Computer Science

School of Sciences | Agostinho Neto University

42 School

Higher education diploma

EXPERIENCES

TECHNICAL TRAINEE (12/2020 to 06/2021)

- Infrastructure Maintenance and Support: Responsible for diagnosing and resolving hardware and software incidents, ensuring the operational continuity of critical power distribution systems.
- Network and Connectivity Management: Assisted in the configuration and maintenance of Local Area Networks (LANs), ensuring stable communication between departments and billing systems.
- Specialized Technical Support: Provided direct end-user support, resolving configuration issues related to operating systems, peripherals, and corporate software tools.

System Optimization: Collaborated in implementing improvements to internal IT processes, focusing on the efficiency of technical support and data security.

CO-FOUNDER (11/2024 to 04/2025) Health tech

- Backend Development: Structuring scalable APIs using NestJS to support platform operations.
- Data Management: Implementation of MySQL databases via Prisma ORM, focusing on performance and data integrity.
- Integration and Security: Development of secure integration flows for the efficient processing of sensitive information.

Product Architecture: Definition of the technical architecture and continuous code optimization for improved performance and user experience.
